We know that from Shakespeare's mind came the words for about 38 plays.

We know that Shakespeare invented a lot of the words we currently use.

We know that Shakespeare had an unusually large vocabulary.

We know that Shakespeare was linguistically exceptional.

We know that from Shakespeare's mind came the words for about 38 plays. ✖

Nothing amuses more harmlessly than computation, and nothing is oftener applicable to real business or speculative inquiries. A thousand stories which the ignorant tell, and believe, die away at once, when the computist takes them in his gripe.

(Samuel Johnson, 1709 - 1784)

* computers are programmed in a language

* in computers, as in texts, context is all

* Boolean logic is like philosophical logic
